

APAR SARAN

+91 9927942982 ◇ Agra, India ◇ aparsaran1721@gmail.com ◇ [GitHub](#) ◇ [Portfolio](#)

PROFESSIONAL SUMMARY

DevOps Engineer experienced in CI/CD automation, containerization, AWS, and infrastructure. Passionate about building reliable, scalable, and automated deployment workflows.

TECHNICAL SKILLS

Programming & Databases: C++, Python, Bash, MySQL
CI/CD & Cloud Platforms: Jenkins, GitHub Actions, AWS, Terraform
Containers & Code Quality: Docker, Kubernetes, Maven, SonarQube, Nexus
Version Control & OS: Git, GitHub, Linux, Windows

EXPERIENCE

Project Intern May 2025 - June 2025
Motilal Nehru National Institute of Technology [Certificate](#) ◇ Prayagraj, India

- Analyzed smart-grid data and image datasets (15,000+ samples) to detect open and short circuit faults using ML and DL models.
- Developed and compared 5 ML/DL models trained on a 160,000+ row dataset to forecast electricity prices, improving forecasting accuracy and system performance.

Cloud & DevOps Intern April 2026 - August 2026
THIRD AI PLATFORMS PRIVATE LIMITED [Certificate](#) ◇ Delhi, India

- Automated end-to-end pipelines using Jenkins and GitHub Actions, reducing manual deployment efforts by 40% and boosting release frequency by 3x.
- Provisioned and managed AWS infrastructure using Terraform and Docker, containerizing 12+ applications for Kubernetes (kubeadm) deployments.
- Integrated SonarQube, Maven, and Nexus to establish robust code quality gates and artifact management pipelines, reducing deployment errors by 30%.

PROJECTS

Smart Hospital Automation Platform

- Deployed and customized the **Bahmni** framework across **3 platforms** (**OpenMRS**, **OpenEMR**, and **Odoo 16 ERP**), digitizing clinical/admin workflows for a hospital serving **100+ daily OPD patients**.
- Engineered **8+ custom Docker images**, resolved **12+ networking/AtomFeed** synchronization errors, and patched **4 critical bugs** in scheduling and provider-mapping modules.
- Automated **7 hospital workflows**: patient UHID registration, doctor profile, scheduling, OPD queue, clinical EMR consult, e-prescription, and Odoo billing/invoicing.
- Synced data between **OpenMRS** and **Odoo** via **AtomFeed**, ensuring real-time patient record propagation across clinical, pharmacy, and billing modules with zero data duplication.

E-commerce Website with integration of Headless CMS

- Engineered a decoupled, high-performance E-commerce platform by integrating **Astro (SSG)** and **PocketBase (Headless CMS)** on GCP, reducing page load times to **1-3 seconds** and achieving perfect **Lighthouse scores**.
- Eliminated 24/7 server hosting costs by leveraging SSG; configured the GCP Compute Engine VM to run on-demand dynamically only during product catalog modifications (add/edit/delete updates).
- Deployed a live, fully synchronized catalog of **20+ products** using PocketBase webhooks to trigger automated frontend rebuilds and CI/CD pipelines on **Cloudflare Pages** via **GitHub Actions**.
- Secured database endpoints by developing server-side API proxy routes and response caching, shielding database credentials and preventing direct database exploitation.

EDUCATION

Dayalbagh Educational Institute, Agra – *Bachelor of Technology (B.Tech)* 2023 - 2027 **CGPA: 8.27/10**

CERTIFICATIONS & ACHIEVEMENTS

- Awarded the prestigious **Director's Medal** at Dayalbagh Educational Institute for securing the highest marks (9.98 CGPA) in Class X.
- Completed the comprehensive **6-month DevOps & Cloud Engineer** training program from **Code for Success** ([Certificate](#)).
