

APAR SARAN

+91 9927942982 ◇ Agra, India ◇ aparsaran1721@gmail.com ◇ github.com/aparsaran1721

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in CI/CD pipeline automation, containerization, AWS, and infrastructure management. Passionate about building reliable, scalable, and automated deployment workflows.

TECHNICAL SKILLS

Programming & Databases: C++, Python, Bash, MySQL
CI/CD & Cloud Platforms: Jenkins, GitHub Actions, AWS, Terraform
Containers & Quality: Docker, Kubernetes, Maven, SonarQube, Nexus
Monitoring & OS: Prometheus, Grafana, Git, GitHub, Linux, Windows

EXPERIENCE

Project Intern May 2025 - June 2025
Motilal Nehru National Institute of Technology Prayagraj, India

- Worked on smart-grid data and image analysis to detect open and short circuit faults using ML and DL techniques.
- Built and optimized ML/DL models for electricity price prediction, improving forecasting accuracy and system performance.

Cloud & DevOps Intern April 2026 - August 2026
THIRD AI PLATFORMS PRIVATE LIMITED Delhi, India

- Automated end-to-end software delivery pipelines using Jenkins and GitHub Actions, reducing manual deployment efforts and boosting release frequency.
- Provisioned and managed scalable cloud infrastructure on AWS using Terraform and Docker, containerizing applications for Kubernetes (kubeadm) deployments.
- Integrated SonarQube, Maven, Nexus Repository, Prometheus, and Grafana to establish robust code quality gates, artifact management, and real-time infrastructure monitoring.

PROJECTS

Smart Hospital Automation Platform

- Deployed and customized the **Bahmni** healthcare framework (integrating **OpenMRS**, **OpenEMR**, and **Odoo** services) to fully automate a local hospital's workflow.
- Engineered custom **Docker** images, resolved networking connectivity errors between services, and patched code bugs in scheduling and provider mapping modules.
- Automated the complete end-to-end patient journey: registration, clinical consultation, digital prescription routing, and Odoo-driven billing and pharmacy inventory dispensing.

E-commerce Website

- Decoupled content management from rendering by integrating **PocketBase (Headless CMS)** with **Astro (SSG)** on a **GCP Compute Engine** VM, achieving sub-second load times and near-perfect SEO/Lighthouse scores.
- Automated publishing by routing webhooks from PocketBase to trigger **GitHub Actions** rebuilds on **Cloudflare Pages**, enabling non-technical users to update the catalog instantly without code changes.
- Developed secure API proxy routes and response caching, shielding database credentials and preventing direct database exploitation while minimizing query overhead.

EDUCATION

Dayalbagh Educational Institute, Agra – *Bachelor of Technology (B.Tech)* 2023 - 2027 CGPA: 8.17/10

CERTIFICATIONS & ACHIEVEMENTS

- Awarded the prestigious **Director's Medal** at Dayalbagh Educational Institute for securing the highest marks in Class X.
- Completed the comprehensive **DevOps & Cloud Engineer** training program from **Code for Success**.
